

Staircase to binary world

[Problem](#)[Submissions](#)[Leaderboard](#)[Discussions](#)

You are asked to build a staircase with N steps to the binary world
as an example if you are asked to build a staircase with 4 steps.

```
#
##
###
####
```

Note than there shouldn't be any empty line at the bottom.

Input Format

N - number of steps to build (an Integer)

Constraints

$0 < N < 11$

Output Format

print a staircase as shown in the example

Sample Input 0

```
5
```

Sample Output 0

```
#
##
###
####
#####
```
